

Kid Care Pediatrics®

Vaccine Policy

The medical staff at Kid Care Pediatrics follows the American Academy of Pediatrics (AAP) recommended vaccination schedule.

We believe vaccines effectively protect our patients against serious illness and disease. Vaccinating our patients also protects other patients who are too young to receive vaccines or who are immunocompromised. We believe vaccines are also beneficial in preventing disease outbreaks in the community.

For these reasons, it is necessary for patients to receive vaccines in order to establish care at Kid Care Pediatrics.

While we respect the views and differing medical philosophy regarding patient care of patients, those families who choose not to vaccinate their children will be gently referred to other healthcare facilities for continuing medical care.

Further vaccine education information can be found at the following trusted resources:
